

MonoScan® , Solid AT's non-contact, ultrasonic level gauging device is now Ex NEPSI certified

Tel-Aviv, Israel, January 24, 2006 --- Solid Applied Technologies, Ltd. (Solid AT) a leading provider of ultrasonic and radar level measurement instruments, announced today that it has received the Ex NEPSI approval from the Chinese National Supervision and Inspection Centre for Explosion Protection and Safety of Instrumentation (NEPSI) - EEx ia IIC T4 for its new revision of MonoScan® non-contact, ultrasonic gauging device intended for use in potentially explosive atmospheres as per Directive GB3836.1-2000 and GB3836.4-2000. The MonoScan® product line is ideal for use in liquids, solids and open channel flow applications and is known as the world's smallest open channel flow gauging device.

Solid AT has been assessed for intrinsic safety protection concepts as well as for equipment categories. The Ex NEPSI certification opens doors for Solid AT to the Chinese fast-growing instrumentation market and to active participation in bids published by the Chinese government.

The Ex NEPSI approval will allow Solid AT to supply safe level measurement solutions for hazardous areas such as acidic liquids, flammable gases and vapors and for many applications in the oil, petrochemical, wastewater and petroleum industries. Moreover, Solid AT' products are equipped with a sophisticated compensation tool which enables their usage in heavy and very flammable vapors surroundings such as: Naphtha, Toluene, Acetone and more.

About Solid Applied Technologies:

Solid Applied Technologies designs, develops, manufactures, markets and services sophisticated level measurement and gauging systems. The Company is a world leader in ultrasonic level measurement systems for liquids, solids and open channel flow. The Company's innovative ultrasonic, and radar technologies enable customers to achieve the accuracy and repeatability essential to remaining at the forefront of inventory and process tanks monitoring. Solid's extensive network of distribution and Private Label partners delivers its knowledge and expertise to customers the world over.
